

Rubric for evaluation of Web Application Development Project

A rubric specifies the specific criteria on which the teacher makes a judgment about the level of student performance, depending on the characteristics of the evidence presented.

Aspects to consider in reviewing of the implementation of the project

Aspects to evaluate	Advanced Level (60 points)	Intermediate Level (30 points)	Basic Level (10 points)
Functional requirements	The application fulfils all functional requirements. The application must use the MVC pattern implemented with Struts.	The application fulfils all functional requirements. The application must use the MVC pattern implemented with Struts.	The application fulfils all functional requirements.
Graphic interface	<ul style="list-style-type: none"> - Makes use of available visual HTML elements (buttons, lists, toolbars, popups, etc.), and event handling, to make more intuitive capture and use of the application. - Data validations. - Facilitates the navigability in the application. -Makes use of JavaScript and AJAX. -Makes use of CSS. 	<ul style="list-style-type: none"> - Makes poor use of available visual HTML elements (buttons, lists, toolbars, popups, etc.), and event handling, to make more intuitive capture and use of the application. - Poor data validations. - Poor navigability in the application. -Makes poor use of JavaScript and AJAX. -Makes poor use of CSS. 	- Basic graphical interface
Data	Persistence with Hibernate.	Persistence with Hibernate.	Does not handle persistence with hibernate
Documentation	<ul style="list-style-type: none"> - Level of detail explanation of the code carried by comments in the code. - Capture the 5 most significant application screens and explanation of the most important elements of the project. - Small User Manual. 	<ul style="list-style-type: none"> - Poor level of detail explanation of the code carried by comments in the code. - Capture the 5 most significant application screens and explanation of the most important elements of the project. - Small User Manual. 	Without documentation
